### General project proposal

Overall, how do you feel about the Conesby Data Centre Campus?

### Biodiversity

We are providing biodiversity improvements as part of the application. Please let us know if you have any comments or suggestions in relation to biodiversity.

**Community and Environmental Benefits**

The Campus will generate jobs, supply chain and potential educational benefits. Do you have any ideas or suggestions for initiatives or projects the Campus could support around these areas?

**Community and Environmental Benefits continued**

The Campus including the associated solar farm, will generate environmental benefits. Do you have any ideas or suggestions for initiatives or projects the Campus could support around these areas?

**Construction and Access**

What are your thoughts on the construction of the project?

Construction & Access continued

What are your thoughts on the access to the Site?

Solar Farm

What are your thoughts on the proposed connection and cable route for the solar farm?

Solar Farm continued

Any other thoughts?

Site Layout

What are your thoughts about the Site layout?

## Future Communication

We would like to keep you updated on the proposed development. If you agree to being contacted, please provide your personal details and preferred method of communication.

## Confidentiality of information

Comments may be published, but you will not be identified by name. Rivington Energy will process your personal data solely for the purposes for which it was given and no personal data will be shared with external third parties save to the extent required by law. Your data will only be kept for as long as necessary to aid the purposes for which it was collected.
